

Railway and Locomotive Engineering Volume 11

Filesize: 5.05 MB

Reviews

*This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 502 pages. Dimensions: 9.7in. x 7.4in. x 1.0in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 edition. Excerpt: . . . this bolster is 550 pounds, complete with truss-rod supports. The experience of the Rock Island people had convinced them that a successful draft rigging, as used in their freight equipment, must be longer than to the Second test--Load, 50 tons; 21-32 inch deflection; 1 3-32 inch permanent set. The permanent set of test 2 was largely in the part between the side bearings. The tie bar also gave considerably at the hooks on end, as shown by their bending backward. The blocking of the ends was then moved farther in, being nearly over the side bearings on each side, with 4 feet 8 inches between centers; pressure was then applied so as to rupture the bolster, which occurred at 75 tons pressure, and with an additional deflection of about 15-16 inch just before breaking. The fracture occurred at the same time in both top and bottom longitudinal ribs above and below the space for draftwoods, at the outside corners, and also the corners on same side where reinforce for center pin and plate fills in between the ribs. road, that the wrought-iron bolster, as generally constructed and used almost exclusively in their freight equipment, could not carry the load without resting heavily on the side bearings, and the result of this was sharp flanges. Mr. Wilson made up his mind to make another effort to accomplish an improvement, and gave the problem to his chief draftsman, Mr. G. A. Akerlind. for solution. Mr. Akerlind...
