THE EXTERNAL FIXATOR : AO/ASIF-THREADED ROD SYSTEM SPINE-FIXATOR

Springer Berlin Heidelberg Jun 2012, 2012. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - Professor B.G. WEBER has once again and in a very timely fashion produced a superb book on an orthopaedic subject of great importance. 'The External Fixator' is the most comprehensive text on the subject in orthopaedic literature to date. Professor WEBER thoroughly discusses external fixation with clarity, organization, profuse illustrations and roentgenograms. Professor WEBER acknowledges that the use of external fixation in orthopaedic surgery is not new and traces its history over the years. He points out clearly the fact that though at various times the 'method' has experienced periods of disrepute, modern sophistication, improved technology and a better understanding of its philosophy have given the system a new and perhaps permanent place in the armamentarium of the orthopaedic surgeon. All methods of treatment have critics as well as supporters, and not infrequently the strongest criticisms are the result of poor understanding of the philosophy proposed and its proper implementation. Professor WEBER, in his carefully detailed and well illustrated book, has made it abundantly clear that the use of external fixators in the treatment of fractures must be clearly understood by the orthopaedic surgeon in order to obtain satisfactory clinical results. His discussion of its philosophy, pathomechanics and technology are most comprehensive and leave 'no stone unturned' and because of this the book represents a most comprehensive text on the subject. 396 pp. Englisch.
