As we enter the 21st century, we're standing at the confluence of three powerful technological forces: computers, telecommunications, and electronic entertainment. The computer's digital technology is showing up in everything from telephones to televisions, and the lines that separate these machines are eroding. This digital convergence is rapidly-and radically-altering the world's economic landscape. Start-up companies and industries are emerging to ride the waves of change. Some thrive; others jive into oblivion. Meanwhile, older organizations reorganize, regroup, and redefine themselves to keep from being washed away. Smaller computers, faster processors, smarter software, larger networks, new communication media-in the world of information technology, it seems like change is the only constant. In less than a human lifetime, this technological cascade has transformed virtually every facet of our society-and the transformation is just beginning. As old technologies merge and new technologies emerge, far-fetched predictions routinely come true. This headlong rush into the high-tech future poses a challenge for all of us: How can we extract the knowledge we need from the deluge of information...
