Oxford University Press, United Kingdom, 1999. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.When should organizations contract out services traditionally produced in-house? Is outsourcing another ephemeral management fad, or is it an efficient and effective means of delivering services and of adding value? What are the characteristics of strategically sound contracting decisions, and how can organizations prosper from the outsourcing revolution? These questions are among those tackled by Simon Domberger. Based on over a decade of research and consulting experience, its conclusions have many practical implications. The book develops an analytical decision-making framework for the assessment of contracting options, and has relevance in both the private and public sectors. Containing a wealth of illustrations and over 25 case studies, the coverage is fully international. Over 50 companies and public sector organizations are discussed, including well-known names such as Microsoft, BP, Marks Spencer, and Samsung. This book will be valuable to all those seeking a better understanding of the outsourcing phenomenon, and useful to managers, strategists, management and business consultants, public sector administrators, policy makers, as well as to students of economics, business, management and public administration. Pre-publication Endorsements John Kay, Said Business School Oliver Hart, Harvard University Rob Grant, Georgetown University.
