Clemens Hauser Publishing. Paperback. Condition: New. 60 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Your country can reduce the price of electricity by greater than half with clean power! This book, written by marketing strategist Clemens Hauser from the green energy country of Germany, introduces a breakthrough concept in renewable energies worldwide. By implementing this concept, countries can reduce the price of electricity, heating costs and driving expenditures by greater than half with clean power. How By consuming self-owned electricity from self-owned photovoltaic modules and wind power shares from photovoltaic plug-in fields in each regional county! A big advantage of this concept is that it works without the costly feed-in tariffs. The book explains the details of the concept and identifies the advantages for the private user, the community, the country and ultimately the world. A step-by-step guide is included to outline the political and practical implementation. Here a short explanation of the concept (excerpt from the text): To offer a solution to the current high-price energy problem, the market concept will show how the citizens, the communities and the state, together, could manage the following, within a maximum of two to five years: -citizens can reduce their electricity price to 8-9 euro cents/kWh, or respectively to 10-12 dollar cents/kWh -electricity will then be the most cost-efficient solution for heating and even more cost efficient for electric cars -your country could switch to 80-100 clean energy, so that the turn to a sustainable energy supply could soon be finalized -the new boom of clean energy production is possible even without any feed-in tariffs. Sounds ambitious With the right plan and the right planning everything can be accomplished! Don't you think so as well So, how do we achieve all that We will achieve the above-mentioned objectives through photovoltaic plug-in fields with...
